Correction: The value of oral selective estrogen receptor degraders in patients with HR-positive, HER2-negative advanced breast cancer after progression on ≥ 1 line of endocrine therapy: systematic review and meta-analysis

Xiewei Huang^{1,3†}, Yushuai Yu^{1,3†}, Shiping Luo^{1,3}, Wenfen Fu^{1,3}, Jie Zhang^{1,2,3*} and Chuangui Song^{1,2,3*}

Correction: BMC Cancer 24, 21 (2024)

<https://doi.org/10.1186/s12885-023-11722-4>

Following publication of the original article [1], the authors reported an error in the fourth sentence of the first paragraph of the “Safety” sub-section of the “Results” section (copied and in bold below for your ease of reference): **The proportion of drug discontinuation caused by TEAEs in the three treatment groups of SERENA-2 was 14.9% (camizestrant 75 mg), 21.9% (camizestrant 150 mg), and 4.1% (standard-of-care ET), respectively.**

We have quoted the proportion of TEAEs leading to dose interruption, rather than those leading to discontinuation which is an error. The correct sentence should be: **The proportion of drug discontinuation caused by treatment related AEs (TRAEs) in the three treatment groups of SERENA-2 was 2.7% (camizestrant 75 mg), 0% (camizestrant 150 mg), and 0% (fulvestrant as standard-of-care ET), respectively.**

The original article [1] has been corrected.

Published online: 13 February 2024

[†]Xiewei Huang and Yushuai Yu contributed equally to this work and share first authorship.

The online version of the original article can be found at <https://doi.org/10.1186/s12885-023-11722-4>.
